Professional Profile

Software Developer with hands-on experience in backend development, web and mobile applications, artificial intelligence, and data science. Experienced in designing and developing REST APIs, scalable services, integrated systems, and data processing pipelines, leveraging software architecture, data modeling, and software engineering best practices. Skilled in implementing Machine Learning solutions, integrating services, working with distributed systems, databases, and cloud computing.

Skills

- **Programming Languages:** Python, Java, JavaScript, C++, C, Dart, C#
- **Frameworks & Libraries:** Flask, Spring Boot, Next.js, React, NestJS, Flutter, TensorFlow, FastAPI, Hibernate, Kafka, RabbitMQ
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud:** AWS (S3, EC2, Lambda, CloudWatch), Firebase
- **Tools & Platforms:** Docker, Databricks, Power BI, Postman, n8n, Unity, Blender, Microsoft Excel
- **Languages:** Portuguese (Native), English (Advanced – C1), French (Beginner – A1)

Experience

Cognita: Notes & Reminders — Mobile App | [Play Store](#)

Developed and deployed a productivity mobile application to production, featuring a multimedia note-taking system, file management, reminders, and scheduling. Implemented data persistence, local storage, media management, scheduled notifications, and integration with native device features.

Developed backend, web, and mobile applications, as well as artificial intelligence solutions, with a focus on implementing REST APIs, system integrations, and data-driven services using Python, Java, and TypeScript. Experienced in software architecture, database design, data processing, large language models (LLMs), automation, and the development of scalable applications.

Education

Systems Analysis and Development UniCesumar, Maringá/PR 03/2025 - 07/2027 (In Progress)

- Participated in undergraduate research and extension projects focused on robotics, backend development, databases, and Agile methodologies.

Software Development Instituto de Educação Estadual de Maringá (IEEM), Maringá/PR 02/2022 - 12/2024

- Experience in front-end, back-end, and mobile development, with projects involving Deep Learning and Computer Vision.

Projects

• Image Web Scraper — Python / Selenium / BeautifulSoup - [Link](#)

Developed a system for automated image extraction using web scraping and data processing techniques.

• Agente Wrapper de IA Generativa — LLMs / RAG / Embeddings

LLM-based assistant featuring RAG, embeddings, semantic search, AI API integration, tool calling, autonomous agents, and STT/TTS capabilities for task execution and multimodal interaction.

• Artificial Intelligence Mobile ApplicationI — Kotlin / LLMs / RAG / SQLite

Developed a mobile application integrated with AI models, using RAG for context processing, SQLite for local data persistence, and integration with external services.

Supplementary Courses

- Python Básico ao Avançado + RPA + Criação de Projetos Reais - Udemy - 2026
- Java COMPLETO Programação Orientada a Objetos + Projetos - Udemy - 2026
- Formação Completa Inteligência Artificial - Udemy - 2025
- Fundamentos de Linguagem Python para Análise de Dados e Data Science - Data Science Academy - 2024
